Microsoft has added many layers of security with multiple warnings when any software is being installed that did not originate from Microsoft itself. Please follow the example below to be able to answer these prompts.

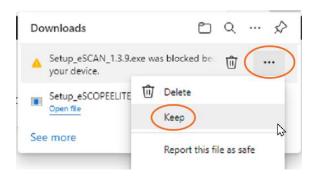

Please be assured our software is completely safe and thoroughly tested before it is cleared for downloading.

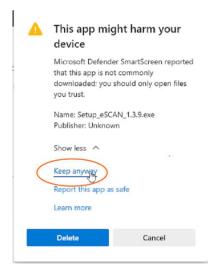

Setup_eSCAN_1.3.9.exe was blocked because it could harm your device.

Please click anywhere on the above warning.

An ellipsis (...) will be displayed, click on it, then choose "Keep".

You will receive another warning, please click on "Keep anyway"

Once you open the file, you will receive another warning, click on "More info", then "Run Anyway".
